

## SCORPION

### TOW BALL FOLDING PLATFORM TYPE BIKE CARRIER

Scorpion with its distinctive design provides a great solution to carry regular or heavy bikes such as mountain bikes and electric bikes. The robust structure and convenient foldable features offer you brand-new experiences of BUZZRACK.

- Supplied almost fully assembled, minimum work required
  - Takes heavy bike up to 30kg per bike
  - The patented conical tow ball clamp fits onto all ISO 50mm diameter tow balls. Simple, fast and secure.
  - Genuinely easy to tilt with front access, well balanced during the tilting phase and tilts far enough for gate access
  - The wheel holders accommodate all wheelbases with strong wheel straps that can be easily adjusted
  - The wheel straps allow a quick and secure attachment of the wheels
  - An extra anti-sway strap to prevent the front wheel from swaying
  - Both clamps fit most bike frames with integrated pads to prevent scratches on the bike paints
  - Convenient and fully foldable for easy storage
  - All bike holders have locks and the carrier locks to the tow ball
  - Simply slide on and off to install or remove a license plate
  - Equipped with a standard 5 function light with 13 pin plug.
  - 13 pin to 7 pin adapter supplied with the product
  - The build quality - tube bending, welding, rust proofing, painting, component quality, is exemplary. All tools you might need are provided
  - A ramp is available as a separate accessory to help you load or remove bikes
  - Fat bike kit is available as a separate accessory that fits up to 4.6" tires

    - Lighting board plug type: 13 pin (Lighting adapter 13 pin (rack) to 7 pin (car) included)
    - Bike carrier to tow ball lock: yes
    - Bike carrier to bike lock: yes

Max S = xx kg	SCORPION	
40 kg	18.3 kg	Max 21.7 kg
50 kg		Max 31.7 kg
60 kg		Max 41.7 kg
70 kg		Max 51.7 kg
> 80 kg		Max 60 kg

**Useful information:**

The maximum permitted load you can carry is also determined by the tow bar nose weight; you will need to check you don't exceed this before using any tow ball mounted bike carriers. Require 65mm clearance from centre of tow ball to rear of vehicle. If you have a 7 pin socket, the reversing light and fog light will not work. The 7 pin socket isn't wired for these functions.
